

TACTICAL WIRE COMMUNICATIONS SOLUTIONS LLC

WE KEEP IT MOVING

CAPABILITIES STATEMENT

Company Information

UEI: GKZ1NIU3GK55
CAGE Code: 9QGD7

Federal Certifications:

- SBA

Social-Economic:

- Service Disabled Veterans Owned Small Business (SDVOSB)
- Veteran-Owned Small Business (VOSB)
- Minority-Owned

Contact Information

P.O.C: Darren Johnson

Cell: 706-284-3191

Office: 919-726-9242

email: DJohnson@twcs8625.com

Address: 823 Broad Ste, PMB 3336

Augusta, GA., 30901

Empowering Operational Excellence Through IT Project Management

At Tactical Wire Communication Solutions (TWCS8625), our core expertise lies in Information Technology Project Management, designed to help organizations reach operational excellence. We go beyond conventional IT approaches, utilizing advanced technologies and established methodologies to oversee complex projects spanning multiple industries.

Technology-Driven Strategies for Project Success

Our technology-driven strategies are at the heart of our project management philosophy. By harnessing the power of innovation, we streamline workflows, elevate collaboration among teams, and achieve measurable results for our clients. TWCS blends innovative solutions with strict adherence to regulatory compliance, ensuring every project is executed with precision, efficiency, and transparency.

Data-Driven Decision Making

We provide real-time insights, predictive analytics, and automated reporting to help you make smarter decisions faster. By turning data into actionable intelligence, TWCS keeps your projects on track and aligned with your strategic goals.

Scalable Solutions Without Limits

Our flexible project management frameworks adapt to your industry needs, enabling us to deliver consistent results whether you're upgrading IT infrastructure, managing complex engineering projects, or implementing secure systems. No matter the size or scope, TWCS scales with you.

PAST PERFORMANCE

- **Leidos Corporation** – Directed Cyber training environments for U.S. Army Cyber Center of Excellence, ensuring compliance and readiness.
- **Parsons Corporation** – Designed and implemented Cyber training simulations to improve operational decision-making.
- **CSC** – Conducted vulnerability assessments and secured 128 systems for early launch of Cyber training for 600+ personnel annually.
- **U.S. Department of Defense** – Designed and implemented two Training Battle Labs and Virtual Training Centers at Fort Gordon, GA.

CORE COMPETENCIES

Technology Services

TWCS8625 delivers robust, secure, and scalable technology solutions tailored for government operations. Our approach combines practical innovation with compliance-driven execution to ensure safe and successful outcomes.

Services Include:

- Network Architecture & Cybersecurity (FISMA, NIST, CMMC compliant)
- Cloud Services (AWS, Azure, GovCloud)
- IT Help Desk & Managed Services • Data Center Design & Operations • Secure Communications Systems

Engineering Services

Our engineering capabilities are built around precision, resilience, and compliance. We specialize in wired communications infrastructure for industrial, energy, and high-security environments, including nuclear facilities.

Services Include:

- Consulting: Technical advisory, feasibility studies, code compliance, and value engineering.
- Project Support: Coordination with architects, contractors, and regulatory agencies to ensure smooth execution and delivery.
- Sustainability & Efficiency: Integration of energy-efficient and environmentally responsible design principles.
- Engineering Design: Civil, structural, mechanical, and environmental systems tailored to client specifications and regulatory standards.

Construction Services

Facilitates infrastructure growth through reliable, scalable, and operational communication systems. We offer comprehensive construction services emphasizing secure facilities and essential installations for mission-critical installations

Services Include:

- General Contracting & Site Preparation
- Utilities Coordination & Infrastructure Support
- Structured Cabling & Fiber Optics Installations • SCIF Build outs & Secure Facility Construction • Electrical Systems & Low Voltage Installation

Simulators (Software & Systems Development)

Focuses on creating, developing, and integrating sophisticated simulation software and systems for training, analysis, and operational assistance. Our offerings utilize state-of-the-art technologies like virtual reality (VR), augmented reality (AR), artificial intelligence (AI), and real-time data modeling to craft engaging, interactive environments customized to meet the unique requirements of our clients.

Services Include:

- Custom simulation software development for training and analysis
- Integration of virtual reality (VR), augmented reality (AR), and AI technologies
- Digital twin modeling and scenario-based simulation environments
- Human-machine interface (HMI) design and optimization
- Simulation-based decision support and analytics platforms

What makes TWCS8625 Unique?

- **Veteran-owned business** with 40 years of IT and secure communications experience, including 30+ years in cybersecurity roles.
- **Technology at the Core** we integrate advanced IT solutions into every project, ensuring efficiency, transparency, and security from start to finish.
- **Risk Management & Reliability** Our processes prioritize compliance and risk mitigation, giving clients confidence that projects meet the highest standards without surprises.
- **Scalable & Adaptable Solutions** From small initiatives to enterprise-level programs, TWCS delivers flexible frameworks that adapt to your goals—without limiting your industry or scope.
- **Leadership experience** as U.S. Army Senior NCO, managing multi-million-dollar assets and mission-critical operations.
- **Cleared Personnel** (Secret/Top Secret eligible)
